

USING THE PROPER STONE CARE PRODUCTS TO PROTECT STONE

Soft stone Weathering Prevent • Water-proof protect dirt Agent

ISHINOL SERIES

STONE POWER NEW

STONE POWER NEW protects weathering of stone.

It isn't a film, make deep penetration layer for protects stone form weathering and a deterioration

【FEATURE】

- STONE POWER NEW's main component is silicon compound. And it permeates inside of stone deeply and makes a strong crystal like glass. This hard crystal covers pore of stone and protects form weathering. And strong water-proof protects to come into water.
- It dose not make a film so stone ventilation smooth
- it makes repellent dirt and easy care. It is able to wash out by water rinse or use neutral detergent.
- it become to have staying power and well Acid resistance, Alkaline resistance.
- Keep stone's natural appearance.

KONSHO CO., LTD.

【CHARACTERISTICS】

Appearance	Clear Colorless Solvent
Element	Silicon compound and Special blend of a special silicon compound
UN CODE	Class 3 Number 1263
Handling	Flammable, handle with care

【PACKING】

20 liter in a round UN can for export

【KIND OF TARGET STONE】

- Tuff
- Sandstone
- Softstone
- Limestone
- Stone with high percentage of absorption

【SATANDARD APPLICATION QUANTITY】

1 m²~5 m² / litter

KONSHO CO., LTD.

【IN TIME OF APPLY】

In the following cases, please avoid applying.

1) Weather –especially out side work–

a) Apply in the rain.

Before / in between / After, if stone get much wet and water, there is uneven color.

So don't apply in the rain.

Please pay attention for weather and water drop by rain after applied.

b) Hot weather

Hot time: over 25°C

Cold time: below 5°C

When the stone is hot, dryness is too fast. When it is cold, infiltration becomes bad.

Because the infiltration layer where both are deep not enough made easily, an enough effect cannot be shown.

※If the temperature is high, it can apply if the surface temperature of stone is low in shade but please take care enough.

2) Stone State

a) It is wet and humid.

b) Water permeates through like spots and comes up from the bottom side of stone.

c) There are water and an oil stain by the caulking around the joint.

d) Done wax or it was done.

⇒The effect becomes irregular in these case because the same infiltration is obstructed.

Regarding use it as back/side processing.

Consider when use it, the adhesive power of cement is dropped. If you have question, inform us.

PRIOR TO TREATMENT

Wash thoroughly with ISHICLEAN Serise (or other washing agent but please be careful for don't make damage on stone) removing all stains, oil, wax etc. that may obstruct penetration.

Allow to dry after washing. If not properly dry, there is the possibility that stains and unevenness may occur.

Please see at MSDS about details of safe handling.

KONSHO CO., LTD.

【ATTENTION IN APPLING】

- The stone must be completely dry before coating. If stone got wet or has moisture, it might not be effect completely and find color difference on it.
- Test a small out of the way area to verify appearance and not change color.
- Protect and carefully for apply area from direct sunshine in hot season.
- Note and attention with dark color change of stone with low percentage absorption stone.
- After apply STONE POWER NEW that use CLEAR COAT SUPER makes high effective for water-proofing.

【USAGE】

1) Pre-Test

Please test before application and confirm color tone etc.

See above information for available to apply stone or not.

Quantity of apply is depend of stone so decide quantity before use.

2) Prior to treatment

Wash stone dirt thoroughly with ISHICLEAN Serise.

3) Dry

Dry completely.

It becomes uneven color and tick cause didn't make deep penetration layer if it isn't enough dry.

4) Apply

Apply undiluted agent evenly with clean brush or roller etc. (Do not use spray)

Apply 100cc/m² for several times. If apply 50cc/m², it times 2.

* Water must not drop for 24 hours or more on it and please avoid a public walking, too
