

PROTECTIVE AGENT FOR STONE SURFACES

ISHINOL SERISE **EYE BARRIER**

【USE】

EYE BARRIER can protect the polished surfaces of marble and granite etc.

→ Protects such surfaces as table tops, counter tops and dressers.

→ Protects the surface of grave stones.

EYE BARRIER is particularly effective on polished surfaces. When EYE BARRIER is used for damaged or uneven surfaces, they may become wet and uneven in color.

EYE BARRIER cannot be used for polished floors.

【CHARACTERISTICS】

EYE BARRIER forms a thin film. Since variations in quality of the material are small, it may also be used only on small portions.

EYE BARRIER is inorganic and does not influence a human body after the film dries.

EYE BARRIER cannot be used for regeneration of luster.

【USAGE】

It's soaked EYE BARRIER with a soft cloth.

Please spread it politely and thinly.

Please politely wipe up with a clean and dry cloth within 30 seconds after it spreads.

In addition, please apply it repeatedly without thickness when you prefer to put on glossier.
