

USING THE PROPER STONE CARE PRODUCTS TO PROTECT STONE

POWERFUL ACID DETERGENT

ISHICLEAN SERIES

POWER HANAKO

A hydrogen fluoride ammonium (less than 4%) is contained.

(Before washing)

(After washing)

POWER HANAKO is an acid based detergent for the removal of stubborn water stains and other stains which can not be removed with SABITORE HANAKO. POWER HANAKO can be used for granite (uneven surface) and porcelain tiles.

KONSHO CO.,LTD.

POWER HANAKO is the detergent which contains a hydrofluoric acid. Use protective rubber gloves and wear clothes and glasses to protect your skin during the use.

【USAGE】

Recommendation dilution rate : 5 times ~ 100% original. Mix with only water.

Test a small out of the way area as mentioned in the following usage. Dilution rate for the test is 3 times first.

- (1) Test : Test a small out of the way place.
- (2) Before application : Wet the surface
- (3) Application : Apply POWER HANAKO, 5 times dilution ~ 100% concentration.
- (4) Leaving : Leaving time depends on the severity of the stains.
Do not leave for long time. It may give damage to the surface.
- (5) Washing : Wash used brush / polisher with water immediately.
- (6) Neutralization : Neutralize with BUNSAN TARO

Neutralize ratio (Standard)
POWER HANKO : BUNSAN TARO
1 : 2
(A weight ratio at the same dilution rate)

- (7) Washing with water : Water and vacuum.
- (8) Repeat : Repeat (7)
- (9) Coating : Coat with a protective agent "ISHINOL Series".

【NOTICE】

POWER HANAKO is powerful. Only one drop may make the material white. There is no restoration method except for grinding. Please handle with care.
